

Abstract of the Disclosure

A sign having a rotating display and illuminated with lights. The lights are powered through a slip-ring device on a frame and drive shaft of the display. The power can be from the mains, or alternative energy sources such as solar panels or a
5 dynamo. The rotation can be wind-powered, or motorised. The signs can be used as information display signs or as decorative signs, for example as Christmas decorations.

10 Figure 1 for publication.
